

AMAN KAUSHAL

kaushalaman1225@gmail.com | (+91)7597767675 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CSE undergraduate (CGPA 9.30) passionate about building scalable full-stack systems and data-driven ML applications. GATE 2026 AIR 7798 qualifier with hands-on experience in system design, REST APIs, and real-world project deployment.

SKILLS

- **Full Stack Development:** React.js, JavaScript, HTML, CSS, Node.js, Express.js
- **Databases & APIs:** MongoDB, MySQL, REST APIs, JWT Authentication
- **Backend & Systems:** Redis (Caching), Socket.io (Real-time), System Design Basics
- **Programming Languages:** Python, C++, C, JavaScript
- **AI/ML:** scikit-learn, TensorFlow / PyTorch, OpenCV, Pandas, NumPy
- **DevOps & Deployment:** Docker, GitHub Actions, AWS (Basics), Vercel, Render, Linux
- **Tools:** Git, Postman

EDUCATION

- B.Tech in Computer Science Engineering | JK Lakshmipat University CGPA: 9.30 | 2027
- Class XII (CBSE) | St. Edmund's School, Jaipur 90.0% | 2022
- Class X (CBSE) | St. Edmund's School, Jaipur 90.4% | 2020

ACHIEVEMENTS

- Qualified GATE 2026 (AIR 7798)
- Awarded 100% merit-based scholarship at JK Lakshmipat University; maintained across all semesters.
- Organized 30+ coding contests at JKL CodeCampus, handling problem curation, evaluation, and participant coordination.
- CodeChef Rating: 1316 | Handle: [amankaushal007](#)

EXPERIENCE

- **Deep Learning Intern | The LNM Institute of Information Technology, Jaipur**
Hybrid - Jun 2025 – Aug 2025
 - Worked on deploying deep learning models on Raspberry Pi for offline inference in resource-constrained environments.
 - Optimized models for low-power hardware and explored real-time AI processing pipelines.
 - Gained hands-on experience in embedded AI deployment and hardware integration under faculty mentorship.
- **Teaching Assistant – DSA & DAA Coding Contests | JK Lakshmipat University, Jaipur**
On-site- Aug 2025 – May 2026
 - Organized DSA and DAA coding contests and conducted problem-solving sessions for B.Tech students.
 - Mentored students in algorithmic thinking, competitive programming, and coding fundamentals.
 - Assisted in technical mentorship and evaluation activities during coding labs and contests.

- **Teaching Assistant – C Programming | JK Lakshmipat University, Jaipur**

On-site Jan 2025 – May 2025

- Assisted first-year B. Tech students during C programming labs and tutorials.
- Mentored 100+ students in programming fundamentals and problem-solving techniques.

ACADEMIC PROJECTS

- **Coding Platform for JKLU CodeCampus**

- Built a scalable coding platform supporting contests, automated evaluation, leaderboard tracking, and role-based dashboards.
- Implemented real-time submission handling and performance monitoring for concurrent users.
- Technologies: React.js, Node.js, Express.js, MongoDB, Socket.io

- **Real-Time American Sign Language Recognition System**

- Developed a real-time ASL recognition system using MediaPipe hand landmarks and classical ML models.
- Built a custom dataset of 7200+ labelled images and achieved 94.21% accuracy using Random Forest.
- Deployed on Raspberry Pi 400 for low-power real-time assistive applications.
- Technologies: Python, OpenCV, scikit-learn, MediaPipe, Raspberry Pi

- **AuthChain – Blockchain Supply Chain dApp**

- Developed an anti-counterfeit supply chain system using ERC-721 NFTs and smart contracts.
- Implemented QR-based product verification and role-based workflows for manufacturers, distributors, and sellers.
- Technologies: Solidity, React.js, ethers.js, MetaMask

- **CityLink Analyzer**

- Developed a graph-based city connectivity analysis system using shortest path and MST algorithms.
- Implemented traffic simulation, bridge detection, and centrality analysis with interactive visualization.
- Technologies: Python, NetworkX, Matplotlib
